RNE (Restricciones No Estructurales)

- Si Animal.Estado es "Vivo", no permitir el ingreso de fecha muerte
- Animal.FechaMuerte debe ser mayor o igual a Animal.FechaNacimiento
- Vaca.CantidadPariciones es "0" entonces Vaca.Vaquillona es "Vaquillona"
- Vaca.CantidadPariciones no puede tener valores negativos
- Cria.FechaIngresoCR debe ser mayor a Cria.FechaSalidaCR
- Cria.EstadoCria debe ser "En campo de recría" para que se pueda ingresar Cria.FechaIngresoCR y Cria.FechaSalidaCR
- TieneSalud.ProximaRevision debe ser mayor que TieneSalud.FechaRevision
- Si Animal.Sexo es "Macho" solo puede ser cria o toro
- Si Animal.Sexo es "Hembra" solo puede ser cria o vaca
- Si TieneSalud.EstadoSalud es "Sano", no debe de haber registro en Enfermedad que coincidan con ese animal en esa fecha

Diccionario de datos

-Cooperativa:

NombreCooperativa: Refiere al nombre de la cooperativa. Atributo tipo char(20); no puede ser null; clave primaria.

-Tambo:

NombreTambo: Refiere al nombre del tambo. Atributo tipo char(20); no puede ser null;
clave primaria.

Ubicacion: Refiere a la ubicacion del tambo. Atributo tipo char(70); puede ser null.

NombreCooperativa: Es un atributo foráneo que proviene de Cooperativa; no puede ser null.

-TamboConfig:

NombreTambo: Es un atributo foráneo que proviene de Tambo; no puede ser null; clave primaria.

Atr1: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

Atr2: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

Atr3: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

Atr4: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

Atr5: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

Atr6: Es un atributo que se encarga de guardar un valor de configuración dentro del programa. Atributo tipo integer, no puede ser null.

-Usuarios:

NombreUsuario: Debe de coincidir con el nombre de usuario que se utiliza para ingresar al sistema operativo de linux. Atributo tipo char(20), no puede ser null; es clave primaria.

Rol: Indica el rol del usuario en el sistema. Atributo tipo char(20), no puede ser null.

NombreTambo:Es un atributo
puede ser null.

foráneo que proviene de Tambo; no

-Animal:

IdAnimal:Refiere al código de la caravana del ganado.Atributo tipo char(20); no
puede
ser null; clave primaria.

NombreTambo:Es un atributo foráneo que proviene de Tambo; no puede ser null.

IdPadre: Refiere al código de la caravana del padre. Atributo tipo char(20); no puede
ser null.

IdMadre: Refiere al código de la caravana de la madre. Atributo tipo char(20); no
puede ser null.

Denticion:Es un codigo que se usa para datar la edad del animal en base a su
dentadura. Atributo tipo char(20); puede ser null

Estado:Refiere a si el animal está vivo o muerto. Atributo tipo char(20); no puede ser
null.

Peso: Es el peso en kilos del animal, en la base de datos se guarda el valor
numérico únicamente. Atributo tipo smallfloat; puede ser null.

Raza: Es la raza del animal. Atributo tipo char(20); puede ser null.

Sexo: Refiere a si el animal es macho o hembra. Atributo tipo char(20); no puede ser
null.

FechaNacimiento:Es la fecha de nacimiento del animal. Atributo tipo date; no puede
ser null.

FechaMuerte: Es la fecha de muerte del animal. Atributo tipo date; puede ser null.

-EstadoSalud:

EstadoSalud: Se encarga de guardar solo dos valores "Sano" o "Enfermo", no
puede ser null; clave primaria.

-TieneSalud:

IdAnimal: Es un atributo foráneo que proviene de Animal; no puede ser null;
forma parte de la clave primaria.

EstadoSalud: Es un atributo foráneo que proviene de EstadoSalud; no puede
ser null; forma parte de la clave primaria.

FechaRevision: Refiere a la fecha en la que se realizó la revisión al animal.

Atributo tipo date; no puede ser null; forma parte de la clave primaria.

ProximaRevision: Refiere a la fecha cuando posiblemente se realice una próxima revisión. Atributo tipo date; puede ser null.

Comentario: Alguna observación que se quiera agregar o dato que sea útil para el usuario. Atributo tipo char(100), puede ser null.

-Enfermedad:

IdAnimal: Es un atributo foráneo que proviene de TieneSalud; no puede ser null; forma parte de la clave primaria.

EstadoSalud: Es un atributo foráneo que proviene de TieneSalud; no puede ser null; forma parte de la clave primaria.

FechaRevision: Es un atributo foráneo que proviene de TieneSalud; no puede

ser null; forma parte de la clave primaria.

NombreEnfermedad: Refiere al nombre de la enfermedad que se le detectó al animal en la revisión. Atributo tipo char(20), no puede ser null, forma parte de la clave primaria.

-Medicamento:

IdAnimal: Es un atributo foráneo que proviene de TieneSalud; no puede ser null; forma parte de la clave primaria.

EstadoSalud: Es un atributo foráneo que proviene de TieneSalud; no puede ser null; forma parte de la clave primaria.

FechaRevision: Es un atributo foráneo que proviene de TieneSalud; no puede ser null; forma parte de la clave primaria.

NombreMedicamento: Refiere al nombre del medicamento recetado al animal luego de la revisión. Atributo tipo char(20), no puede ser null, forma parte de la clave primaria.

-Vaca:

IdAnimal: Es un atributo foráneo que proviene de Animal; no puede ser

null; es la clave primaria.

CantidadPariciones: Refiere a la cantidad que la vaca tuvo crías. Atributo tipo integer;
no puede ser null.

IdLote: Es un atributo foráneo que proviene de Lote; no puede ser null.

-VacaEstado:

EstadoVaca: Refiere si la vaca está en pre-parto, en servicio, etc. Atributo tipo char(20); no puede ser null.

-TieneEstadoV:

IdAnimal: Es un atributo foráneo que proviene de Vaca; no puede ser null; forma parte de la clave primaria.

EstadoVaca: Es un atributo foráneo que proviene de VacaEstado. no puede ser null; forma parte de la clave primaria.

FechaInicio: Refiere a la fecha en la que la vaca entró en ese estado. Atributo tipo date; no puede ser null; forma parte de la clave primaria.

FechaFin: Refiere a la posible fecha en la que el animal cambie a otro estado.
Atributo tipo date; puede ser null.

-Toro:

IdAnimal: Es un atributo foráneo que proviene de Animal. no puede ser null; es la clave primaria.

-Monta:

Toroid: Es un atributo foráneo que proviene de Toro, no puede ser null; forma parte de la clave primaria.

Vacaid: Es un atributo foráneo que proviene de Vaca, no puede ser null; forma parte de la clave primaria.

FechaInicio: Refiere a la fecha en la que se produzco el acto. Atributo tipo date, no puede ser null, forma parte de la clave.

FechaParto: Refiere a la fecha en la que se espera el parto. Atributo tipo date, puede ser null.

-Cria:

IdAnimal: Es un atributo foráneo que proviene de Animal. No puede ser null; forma parte de la clave primaria.

EstadoCria: Es un atributo foráneo que proviene de EstadoCria. No puede ser null.

FechaIngresoCR: Indica la fecha en la que el animal ingresa al campo de recría. Atributo tipo date, puede ser null

FechaSalidaCR: Indica la fecha en la que el animal sale del campo de recría. Atributo tipo date, puede ser null.

-EstadoCria:

EstadoCria: Refiere al estado de la cria como "Ternero en pie" o "En campo de recría". Atributo tipo char(20); no puede ser null; es la clave primaria.

-Lote:

IdLote: Es el código por el cual se identifican los lote. Atributo tipo integer; no puede ser null; forma parte de la clave primaria.

Descripcion: Es una descripcion del lote. Atributo tipo char(20); no puede ser null; forma parte de la clave primaria.

Tambo: Indica a que tambo pertenece el lote, proviene de la table tambo. Atributo de tipo char(20), no puede ser null; forma parte de la clave primaria

-Leche:

IdLeche: Es un código por el cual se identifican los tipos de leche. Atributo tipo integer; no puede ser null; es la clave primaria.

Descripcion: Es el nombre de el tipo de leche. Atributo tipo char(20); no puede ser null

-Ordenie:

IdLote: Es un atributo foráneo que proviene de Lote. No puede ser null; forma parte de la clave primaria.

IdLeche: Es un atributo foráneo que proviene de Leche. No puede ser null; forma parte de la clave primaria.

Hora: Refiere a la hora en la que fue hecho el ordeño. Atributo tipo datetime hour to minute; no puede ser null; forma parte de la clave primaria.

Fecha: Refiere a la fecha en la que fue hecho el ordeño. Atributo tipo date; no puede ser null; forma parte de la clave primaria.

Observaciones: Refiere a algún dato que el usuario quiera guardar. Atributo tipo char(70); puede ser null.

Litros: Refiere a la cantidad de litros que se obtuvieron del ordeño. Atributo tipo smallfloat; no puede ser null.

GrasaButirosa: Es un parámetro que conaprole mide de la leche. Atributo tipo smallfloat; puede ser null.

Proteinas: Es un parámetro que conaprole mide de la leche. Atributo tipo smallfloat, puede ser null.

Lactosa: Es un parámetro que conaprole mide de la leche. Atributo tipo smallfloat, puede ser null.

CelulasSomaticas: Es un parámetro que conaprole mide de la leche. Atributo tipo smallfloat, puede ser null.

Consultas solicitadas:

1-Listado de crías en campo de recría con más de 3 meses

```
select animal.fechanacimiento, cria.estadocria, animal.idanimal, cria.idanimal
from animal, cria
where animal.idanimal=cria.idanimal and estadocria="en campo de recria" and
(((today-animal.fechanacimiento)/365)/12)>3
```

2-Cantidad de producción en el último mes

```
select fecha, litros, tambo
from ordenie
where (today-fecha)<=30
```

3-Listado de vacas por estado en el día de la fecha

```
select tieneestadv.idanimal, tieneestadv.estadovaca, max(tieneestadv.fechainicio),
animal.idanimal, animal.estado
from animal, tieneestadv
where animal.idanimal=tieneestadv.idanimal and animal.estadp="vivo"
group by tieneestadv.idanimal, animal.idanimal, tieneestadv.estadovaca, animal.estado
order by tieneestadv.estadovaca
```

4-Número de lote que tuvo más producción hoy

```
select idlote, max(litros)
from ordenie
where fecha=today
```

group by idlote

5-Listar las vacas (id,nombre),prontas para entore
 select animal.idanimal, animal.estado, tieneestadov.idanimal, tieneestadov.estodovaca
 from animal, tieneestadov
 where animal.idanimal=tieneestadov.idanimal and
 tieneestadov.estadovaca="vacía" and animal.estado="vivo"

6-Promedio por día de producción lechera
 select avg(litros), fecha from ordenie
 group by fecha

7-Listar cantidad de animales por tipo de animal
 select count(idanimal) as toros from toro;
 select count(idanimal) as vacas from vaca;
 select count(idanimal) as crias from cria

8-Listar todos los animales por tipo de animal
 select idanimal as toros from toro;
 select idanimal as vaca from vaca;

 select idanimal as crias from cria

9-Listar Id,nombre,edad,raza y progenitores de todas las vacas de un tambo
 select animal.idanimal, ((today-animal.fechanacimiento)/365) as edad, animal.raza,
 animal.idpadre, animal.idmadre, vaca.idanimal
 from animal, vaca
 where animal.idanimal=vaca.idanimal

11- Cantidad de producción de leche para comercializar en un mes determinado
 select sum(litros)
 from ordenie
 where idleche="comercializable"

12-Listado de crías que se encuentran hoy en el campo de recria
 select * form cria where estadocria="en campo de recria"

14-Cantidad de producción y número de lote que tuvo más producción hoy
 select sum(litros), idlote
 from ordenie
 where fecha=today
 group by idlote
 union
 select max(litros), idlote
 form ordenie
 where fecha=today

group by idlote

16- Animales que han sido atendidos por algún problema o control y detalle de los controles en el último mes

select *

from tienasalud

where (((today-tienasalud.fecharevision)/365)/12)>1

17-Establecimiento con mayor producción en el mes de agosto

select limit 1 tambo, sum(litros) as litros

form ordenie

where month(fecha)=8

group by tambo

order by litros desc

18-Total de producción por cooperativa en el mes de agosto

select ordenie.tambo, sum(ordenie.litros), tambo.nombretambo, tambo.nombrecooperativa

from ordenie, tambo

where ordenie.tambo=tambo.nombretambo and month(ordenie.fehca)=8
